DETAILED ACTION

REJECTIONS WITHDRAWN

1. There are no rejections withdrawn.

REJECTIONS REPEATED

2. All of the 103(a) rejections set forth in the non-final rejection of 6/1/06, pages 3-5, paragraphs 4-6 are repeated for the reasons of record.

NEW REJECTIONS

3. There are no new rejections.

ANSWERS TO APPLICANT'S ARGUMENTS

4. Applicant's arguments filed 8/31/06 have been carefully considered but are deemed unpersuasive.

In response to applicant's argument that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988) and *In re Jones*, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). In this case, The motivation to combine is found in EP 0707040 which provides improved stress cracking resistance,

rigidity, flow behavior (page 1 of English translation, first full paragraph, page 4, third paragraph) especially since Herman seeks improved stress crack resistance (column 1, lines 60-67).

Applicant has argued that it has not been explained why one skilled in the art would specifically choose the '040 reference from the myriad of art concerning polyethylene. One skilled in the art would choose '040 because it provides improved stress cracking resistance, rigidity, flow behavior since Herman seeks improved stress crack resistance.

In response to applicant's argument that the examiner's conclusion of obviousness is based upon improper hindsight reasoning, it must be recognized that any judgment on obviousness is in a sense necessarily a reconstruction based upon hindsight reasoning. But so long as it takes into account only knowledge which was within the level of ordinary skill at the time the claimed invention was made, and does not include knowledge gleaned only from the applicant's disclosure, such a reconstruction is proper. See *In re McLaughlin*, 443 F.2d 1392, 170 USPQ 209 (CCPA 1971). In the instant case applicant's disclosure is not needed to see that '040 provides improved stress crack resistance which is a property which Herman seeks to provide.

There is a clear expectation of success since one of ordinary skill is simply providing polyethylene density and melt flow rates provided by '040 in the polyethylene disclosed in Herman. Furthermore, the stress crack resistance is disclosed in Herman (Table 2).

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
